

# Procuring Environmentally Responsible Products and Services

Begins with GSA at [www.gsa.gov/gogreen](http://www.gsa.gov/gogreen)

**For fast, flexible, cost-effective procurement, turn to GSA's Multiple Award Schedules—meet your acquisition challenges while achieving your mission's goals.**

**Speed**—Shorten procurement lead-times and reduce your administrative burden and costs with quick and easy access to thousands of pre-qualified, industry leading contractors.

**Selection**—Compete among a vast selection of expert service and product providers to meet your mission needs from the largest, most reliable government procurement source.

**Flexibility**—Tailor RFQs and orders to your unique purchasing requirements and negotiate pricing below our ceiling rates to fit your specific needs and budget.

**Efficiency**—Streamline contracting while maintaining FAR compliance when you issue orders directly to pre-qualified contractors.

**Value**—Simplify your procurements by tapping into our pool of proven sources that have already been determined responsible and technically capable—at fair and reasonable prices.

**Transparency**—Leverage a suite of eTools that help identify qualified, small business contractors and maximize competition.

**Manage Your Procurement**—Your agency contracting officer will retain control of your procurement, including requirements development, evaluation, and award of the order.

## Supporting Our Shared Mission: Offering Efficiency and Economy of Scale to Your Agency

As federal employees, we all have been tasked with improving the environment by building, operating and buying "green." At GSA, our acquisition solutions offer you direct access to resources and materials your agency can use to meet both federal and agency-specific environmental goals.

We can assist you in all phases of making your organization more environmentally sound and energy efficient. We offer environmental solutions to meet your needs—including developing your organization's Environmental Management System, meeting federal energy requirements, analyzing your energy options (with recommendations for solutions), managing projects for existing green facilities, or building energy-efficient, LEED®-certified facilities.

You can also choose from our full range of products and supplies, as well as environmentally-friendly, routine operational services (like waste disposal). Products and services possess a number of environmental attributes, including but not limited to: recycled products, energy efficient, water efficient, renewable energy, biobased, ozone depleting substance, environmentally preferable products, non-toxic and non-hazardous materials. As a government agency subjected to the same environmental mandates as other agencies, GSA continually updates contracts to ensure vendors offer and supply products that work within environmental goals.

## Services and Products Available From GSA

The GSA Multiple Award Schedule (MAS) program is the largest and most comprehensive acquisition vehicle available to the federal government. GSA MAS contracts offer complete, state-of-the-industry solutions to meet today's environmental mandates. GSA MAS contracts incorporate environmental requirements, such as those included in: Executive Order 13423 (Strengthening Federal Environmental, Energy, and Transportation Management); Energy Efficient (FAR Subpart 23.2); Recycled Products (FAR Subpart 23.4), Environmentally Friendly (FAR Subpart 23.7); Ozone Depleting Substances (FAR Subpart 23.8); and Pollution Prevention (FAR Subpart 23.10). [GSA.gov/gogreen](http://GSA.gov/gogreen)

Listed below are six groupings of environmental services and products to help you determine which services and/or products will meet your needs. The table inside cross references each group to GSA MAS Special Item Numbers (SIN) and programs that include offerings in that group.

### Services

#### Environmental Services

Executive Order 13423 calls for widespread use of Environmental Management Systems (EMS). An EMS is used to assist in the identification, tracking, and prioritization of environmental issues and their impacts. Vendors from GSA MAS can create EMS systems, conduct audits on your current EMS systems or assist with creating your agency's own audit procedures. In addition to expertise on enterprise-level environmental programs, contractors are available for specific operational tasks such as waste management planning; pollution prevention; hazardous materials disposal; electronic recycling; emergency response; water conservation; mold abatement; and environmental occupational training.

#### Energy Management Services

The Energy Management area includes expert services and support in all areas of energy strategic planning, training and implementation of energy projects to assist your agency in meeting your energy efficiency goals in compliance with federal initiatives. The energy management area covers a wide array of energy services from cursory to comprehensive. Services include: comprehensive energy analysis and modernization projects; building commissioning services; metering and advanced metering; energy and water audits and analysis; turn-key renewable energy solutions; energy choice analysis; and feasibility studies and complete support, including billing consolidation and management; consulting; training; and other services on energy-efficient building certifications such as Leadership in Energy and Environmental Design (LEED®).

#### Facility Maintenance Services

GSA offers access to solutions for managing and maintaining facilities in an environmentally responsible manner ranging from complete facilities maintenance and management to an array of individual building maintenance and inspection services. These individual services include: routine maintenance and repair of facilities and systems, including fire alarm and fire suppression systems, elevator maintenance and inspection, refrigeration and HVAC systems, grounds maintenance, and more, with the convenience of using pre-qualified contractors. Additional services including waste disposal; office waste and paper recycling; and hazardous material handling, are also available. Facility Maintenance handles office waste and paper recycling (documents).

### Products

#### Automobile, Equipment and Construction Materials

EPACT of 1992 and 2005 require the procurement of alternate fuel vehicles (AFVs) and the use of alternative fuel in fleets of 20 or more vehicles in areas that can meet certain fueling requirements. Through the following programs, agencies can choose the acquisition method that best suits their requirement: GSA AutoChoice, for buying automobiles; GSA Fleet, for leasing automobiles from GSA; and GSA MAS, for leasing automobiles and light trucks directly from automotive vendors.

In the area of equipment and construction materials, GSA offers almost everything available from the commercial marketplace at competitive prices, with the added benefit of acquisition compliance peace of mind. Search for products and equipment through [www.gsaadvantage.gov](http://www.gsaadvantage.gov) to view the wide selection available from contractors. Offerings include: green roofs; solar window film; HVAC equipment; solar hot water heaters; energy efficient lighting and bulbs; solar energy systems; fuel cells; wind solutions; facility and energy management monitoring systems; building automated controls; air handlers; heat pumps; ventilators; plastic lumber; energy-efficient plumbing fixtures; and much more.

#### Furnishings and Appliances

GSA provides commercial and residential appliances, furniture, furnishings and related services for facilities to include: offices; dormitories; industrial workspaces; healthcare facilities; and educational settings. The products include a wide range of items like floor coverings and hazardous material storage. Options even include GREENGUARD®-certified furniture made from low-emitting materials and Forest Stewardship Certified (FSC) wood, environmentally-friendly flooring, and Energy Star appliances.

#### Office Products, Cleaning Supplies, Paints and Coatings

EO 13423 establishes or updates the standards for environmentally-sustainable practices. This includes defining several categories of products like recycled content products; biobased products; environmentally-preferred products; Energy Star and energy-efficient products; non-ozone depleting products; and priority chemicals. GSA contractors and GSA Global Supply™ carry a full range of recycled paper; remanufactured toner cartridges; returnable postage-paid toner cartridges; mailroom; filing and breakroom supplies; recycling containers; biodegradable tableware; cleaners and sanitizers; and 100% recycled plastic products.

For more information about environmental solutions from GSA, please visit [www.gsa.gov/gogreen](http://www.gsa.gov/gogreen).

# Environmental Products and Services Community Crosswalk

The following Environmental Products and Services Community Crosswalk chart simplifies identifying GSA MAS contracts to meet your specific needs. This crosswalk is designed to help translate your requirements to GSA contracts that can meet those requirements.

The Environmental Areas in the chart simulate store aisles, organizing related offerings for intuitive shopping. Working through the SIN Titles, you can determine which SIN or SINs best meet your needs, and can target those SINs in your Request for Quote. The Environmental Products and Services Community Crosswalk is a one-source reference of the contracts and acquisition methods available for product or service areas.

## How to Use This Chart:

1. Select an Environmental Area.
2. Scan down the Environmental Areas, reading the SIN Titles. When using a PDF version of this document ("USGSA-5-09-00444\_Enviro\_Trifold.pdf" is available at [www.gsa.gov/gogreen](http://www.gsa.gov/gogreen)), the SIN Title is hyperlinked to [www.gsaelibrary.gsa.gov](http://www.gsaelibrary.gsa.gov) for details and contractor listings.
3. Working through the SIN Titles, take note which indicate the SINs available to meet each requirement.

Environmentally-friendly products listed on GSA *Advantage!*®, [www.gsaadvantage.gov](http://www.gsaadvantage.gov), and offered by GSA Global Supply™, [www.GSAglobalsupply.gsa.gov](http://www.GSAglobalsupply.gsa.gov), are identified with environmental attribute symbols to expedite the identification of products that meet specific guidelines. Here is a quick reference for some of the symbols used.

	<b>EPEAT:</b> Electronic Product Environmental Assessment Tool (EPEAT) registered item—Federal ordering activities are required to give preference to information technology (IT) products with an EPEAT rating of gold, silver or bronze.		<b>NESHAP Compliant:</b> The "as applied" formulation of this coating has been certified to meet applicable volatile organic compound and hazardous air pollutant emission limits as established by National Emissions Standards for Hazardous Air Pollutant (NESHAP) regulation, 40th Code of Federal Regulation, Part 63.
	<b>Recycled:</b> Item contains recycled content as described in the item detail (U.S. Environmental Protection Agency [EPA] item meeting EO 13101).		<b>GreenSeal Seal of Approval:</b> This product has been certified to meet or exceed voluntary standards for environmental preferability as established by GreenSeal.
	<b>Comprehensive Procurement Guideline Compliant:</b> This product has been certified to meet or exceed the U.S. Environmental Protection Agency's Recovered Material Advisory Notice (RMAN) standard for recovered materials as specified in the Resource Conservation and Recovery Act Section 6002 Comprehensive Procurement Guideline.		<b>California South Coast Air Quality Management District Compliant:</b> This product has been certified to meet or exceed applicable air emissions standards established by the California South Coast Air Quality Management District.
	<b>Energy Star:</b> Item complies with U.S. Department of Energy (DOE) and U.S. Department of Environmental Protection Agency's (EPA) Energy Star Program as required by the Federal Acquisition Regulation (FAR) Subpart 23.203 and Executive Order 13123.		<b>Biobased:</b> Commercial or industrial items utilizing biological products or renewable domestic agricultural (plant, animal, and marine) or forestry materials.
	<b>FEMP:</b> Item meets Federal Energy Management Program (FEMP) energy efficiency levels as required by the Federal Acquisition Regulation (FAR) Subpart 23.203, Executive Order 13123, and Executive Order 13221.		<b>U.S. EPA Significant New Alternatives Program Approved:</b> This product meets the U.S. EPA Significant New Alternatives Program criteria requirement as a suitable substitute for ozone depleting substances.
	<b>PRIME:</b> Item is included in the Navy's Plastics Removal in Marine Environment (PRIME) program. Items in the PRIME program require biodegradable packing materials.		<b>Non-Toxic Item:</b> Item is non-toxic.
			<b>U.S. EPA Environmental Technology Verification:</b> This product has been evaluated under the U.S. Environmental Protection Agency Environmental Technology Verification Program and found to be an innovative technical solution, beneficial to human health or the environment.

## Obtaining Environmental and Energy Services and Products: GSA Gives You Options

### Services

#### Direct Access to Pre-Approved Contractors Online

GSA's eLibrary serves as the most comprehensive online information resource for Multiple Award Schedules and technology contracts. It allows users to search Schedules, GWACs, and telecommunications and network-services contracts by contractor name, contract number, Special Item Number (SIN), GSA MAS number, geographic location, keywords and to filter contractors by socioeconomic status. To learn more, visit [www.gsaelibrary.gsa.gov](http://www.gsaelibrary.gsa.gov).

#### Time-Saving Ordering Tools

eBuy is an online Request for Quotes tool that enables you to gather information on large or complex procurements, particularly those involving services with hourly wage rates. eBuy simplifies your solicitation process by providing a streamlined tool for you to: post solicitations; receive quotes from GSA MAS, GWAC and other GSA technology contractors; find sources of supply; submit responses; and establish and use Blanket Purchase Agreements. To learn more, visit [www.ebuy.gsa.gov](http://www.ebuy.gsa.gov).

#### Complete Solutions

When your requirements cross multiple disciplines or combine services and products, the strength and diversity of the GSA MAS contractor community can rise to the challenge. For your more complex requirements, many contractors can provide total solutions across numerous Schedules. Additionally, Contractor Team Arrangements (CTAs) allow MAS contractors to create their own partnerships and to provide comprehensive solutions beyond the scope of their individual contracts. Another feature of several Schedules is the inclusion of the Special Item Number (SIN) for ancillary repair and alterations. Each of these SINs allows ancillary work be included as part of a primary task order, eliminating the need for another task order for related work. To learn more, visit [www.gsa.gov/schedules](http://www.gsa.gov/schedules).

#### GSA Assisted Services

GSA offers acquisition, project and financial management for many environmental and energy services, on a short- or long-term basis. We combine acquisition, project management and financial resources to deliver customized, scalable solutions throughout the project's life cycle, on a fee-for-service basis. Working through Interagency Agreements (IAs), GSA establishes the service level expectation with your agency's program, financial, contracting and legal staff to ensure requirements are met on time and within budget. To learn more, visit [www.gsa.gov/aas](http://www.gsa.gov/aas).

### Products

#### GSA MAS: Order from a Comprehensive Selection of Products, from Pre-qualified Contractors

GSA *Advantage!*® is the federal government's premier online ordering system that provides 24-hour access to over 17 million products and services solutions available from over 16,000 GSA Multiple Award Schedules contractors, as well as all products available from GSA Global Supply™. GSA *Advantage!*® offers FAR compliant purchasing; direct contact with schedule contractors; specified grouping of products and services; easy-to-use research capabilities to narrow results and compare features, prices, and delivery options; icons for identifying special attributes of products such as environmental characteristics, preferred sources; or eligibility for state and local programs. GSA *Advantage!*® increases the speed and efficiency of procurements with a streamlined online shopping and ordering experience. For those state and local government entities looking to simplify their procurement process, GSA *Advantage!*® offers them the ability to use their own state or local government-issued charge card to access a wide variety of products and services solutions. It also provides customers with multiple payment options and online viewing of order status to ensure order management from beginning to end. To learn more, visit [www.gsaadvantage.gov](http://www.gsaadvantage.gov).

#### GSA Global Supply™: Just a Requisition Away

GSA Global Supply provides easy access to hundreds of thousands of products for federal users, including several thousand "green" items. From office supplies to cleaning products to paints, GSA Global Supply makes it easy to go green. The best part is that every GSA Global Supply item is available via simple requisition, because GSA has already completed the procurement cycle. No further comparison shopping is required. Customers can order by phone, fax, FEDSTRIP/MILSTRIP or online and get worldwide delivery, AbilityOne (formerly JWOD) guaranteed products and easy compliance with Federal Acquisition Regulations and other DOD, socioeconomic and environmental regulations. To learn more, visit [www.GSAglobalsupply.gsa.gov](http://www.GSAglobalsupply.gsa.gov).

#### GSAXcess®: Reuse is Recycling

Screening other agencies' excess personal property inventories is the federal government's priority source of supply and with today's increased environmental consciousness, reusing excess property is a source of pride. To help you acquire the excess property your agency needs, GSA offers [www.gsa.gov/gsexcess](http://www.gsa.gov/gsexcess), the personal property tool for the federal government. At GSAXcess®, reporting, searching and selecting excess property is convenient and user-friendly.
